

bandwidth :- In context of the internet, the number of bits transferred by a channel per unit time is called bandwidth.

\* Web portal :- A web portal is a web-based platform that provides employees, customers and suppliers with a single access point to information. A web portal can be used to provide the users with personalised information such as employee training, safety manuals or a customer profile.

Common examples of web portals include  
Sales portal, Project management Portal,  
customer portal solution, HR Portal,  
Corporate portal etc.

\* Vsat:- It stands for very small  
aperture terminals.

Vsat is digital in nature and is designed  
mainly to support data communications  
on a point to multipoint basis for  
large private networks in application.

A vsat has a dish antenna with diameters  
between 75 cm to 1 m.

Q.10
