

Internet

Internet :- It is the largest network in the world that connects hundreds of thousands of individual networks all over the world.

- The popular term for the internet is the "information highway".
- Rather than moving through geographical space, it moves our ideas and information through cyberspace (the space of electronic movement of ideas and information).
- Internet is one component which has recently become the key ingredient of quick and rapid life style. Be it for communication or explorations, connecting with people or for official purposes, "internet" has become the central "hub" for all.

Uses of internet

- send e-mail messages
- send (upload) or receive (download) files between computers.
- Participate in discussion groups, such as mailing lists and news groups.

→ surfing the web.

* Surfing :- The act of browsing the internet by going from one web page to another webpage using hyperlinks in an internet browser.
